

Immunisation remains one of the most cost effective healthcare interventions

Despite improvements, uptake for certain childhood immunisations falls below herd immunity

Notable increase in uptake of **MMR vaccine**

Children in Reception, Y1 & Y2 now receive the flu vaccine

65+ Flu vaccine uptake is also low

HPV uptake is significantly lower than England

Key Vaccine	Uptake rate (2016/17)
Hib/Men C at 2	69.7%
D3 at 1	90.1%
D4 at 5	85.8%

Key Vaccine	Uptake rate (2016/17)
MMR1 at 2	85.3%
MMR2 at 5	84.6%

Priority 3 - Improving Immunisation Uptake
